

Women in science share their expertise

PASSIONATE, pioneering and persistent heroines who are making waves in the field of science will be honoured with theme Wonder Women In Science (WWIS) breakfast on Tuesday, 27 August at Coastlands Hotel in Musgrave.

Hosted annually by the University of KwaZulu-Natal's College of Agriculture, Engineering and Science, the campaign aims to honour the faculty's female scientists. The campaign will culminate with the WWIS Breakfast, where each 'wonder woman' will address an audience of staff, students, high school learners and industry professionals.

This event won a Bronze Award of Excellence at the 2018 MACE Congress, which recognises excellence in Marketing Advancement and Communication. The breakfast event will include a welcome address by UKZN Vice-Chancellor, Professor Nana Poku.
